

Focal points candidate board 2023 – 2024

1. Facilitating member participation

The camaraderie within Protos is one of the most beautiful aspects of our association, and therefore, something we want to pass on to new members. With this focal point, we aim to lower the threshold for participation for (new) members by providing tools for those who want to be more involved within Protos. This will be achieved, among other things, by providing more information about activities within Protos, offering more accessible contact for members with the board, and striving to involve new members in committees.

2. Uniform communication

Our goal is to draft a communication plan on the best way to disseminate information within Protos, targeting various communication platforms. We aim to create more clarity on how information is shared and through which channels. Additionally, we want to standardize registrations for activities and devise a consistent plan for the English translation of important informative messages.
